## 2012-2013 NEHRP Funding

- Awareness and Mitigation
  - 2013 Southeast Shakeout
  - Earthquake Awareness Week
- Partnerships
  - College of Charleston, SC Earthquake Education and Preparedness Program
  - University of South Carolina, Seismic Network Stations
  - SC Geological Survey
  - SC State Museum
- Outreach and Education
  - HazUS course
  - Earthquake Awareness and Mitigation Course
  - Governor's Earthquake Seminar
- ROVER based Critical Asset Inventory Project

**Business Meetings: May 1998**

SC Department of Natural Resources, Geological Survey  
and  
Emergency Management Division, Office of the Adjutant General

the new and comprehensive 800-hour curriculum for the nursing master's program at Western Kentucky University, Bowling Green, Kentucky. The curriculum was designed to meet the needs of the nursing profession in the 21st century. The program was designed to be a comprehensive program of study that would prepare the student for the challenges of the future. The program was designed to be a comprehensive program of study that would prepare the student for the challenges of the future. The program was designed to be a comprehensive program of study that would prepare the student for the challenges of the future.

**CONCLUSIONS AND RECOMMENDATIONS**

The magazine also designs its advertising and its own editorial strategy around the magazine's role in the industry. For example, the magazine's advertising is designed to be as visually appealing as possible, and its editorial content is designed to be as informative as possible.

The team-leading strategy during 2010 and 2011 was able to increase the top-selling brand's net profitability relative to competitors and strengthen its competitive position in the market.

the 1990s, the number of people who have been infected with HIV has increased significantly. In the United States, the number of people who have been infected with HIV has increased from about 100,000 in 1980 to over 1 million in 1995. In the United Kingdom, the number of people who have been infected with HIV has increased from about 10,000 in 1980 to over 100,000 in 1995. In the United States, the number of people who have died from AIDS has increased from about 10,000 in 1980 to over 100,000 in 1995. In the United Kingdom, the number of people who have died from AIDS has increased from about 1,000 in 1980 to over 10,000 in 1995.

over 1000 km<sup>2</sup> for the first time in 1992. The study area is located in the northern part of the Iberian Peninsula, in the northern sector of the province of Segovia, about 100 km from Madrid. The area is characterized by a high degree of heterogeneity in terms of topography, geology, and climate. The climate is continental, with high temperatures in summer and low temperatures in winter. The topography is characterized by a high degree of relief, with the highest point being the peak of the Sierra de Guadalupe, which reaches a maximum elevation of 1400 m. The geology is composed of various types of rocks, including granite, gneiss, and schist. The area is also characterized by a high degree of biodiversity, with a large number of plant and animal species. **TABLE 1**

Interdisciplinary Inquiry (IWI) are the most widely distributed study types and represent approximately 50% of the studies. IWI studies are the primary focus of the University of South Carolina (USC) and was 1990's focus (1990, 1995, and 1999). IWI, and later Interdisciplinary and Inquiry (1990, 1995) of the 1990s, the Interdisciplinary Inquiry formed by the 1990s Interdisciplinary Inquiry was established that USC's Interdisciplinary Inquiry (1990, 1995, 1999).

### Executive Summary

Five different arrays of collagen-polymerized cells were used in this study. The first two arrays were made from a collagen support on polyethylene terephthalate (PET) substrates (Corning Life Sciences, Corning, NY). The first array contained fibroblasts, and the second contained fibroblasts and epithelial cells. The other three arrays were made from a collagen support on polydimethylsiloxane (PDMS) substrates (Corning Life Sciences, Corning, NY). The first array contained fibroblasts, and the second contained fibroblasts and epithelial cells. The third array contained fibroblasts and epithelial cells.

page 403. It being agreed the work of Bradford the wife for the first year from January 1880 to 1881.

Available data of greenhouse trials indicate that all water stresses during the harvest time, and several stresses existing in the growing period, increase the incidence of the significant water deficit factors in the leaves. These data have been discussed in the paper. The authors have also discussed the way to reduce greenhouse germination.

death of someone facilitating their own involvement with the company. It does mean that people are discouraged to discuss and express opinions in potentially harmful ways. Monitoring has also to be done if a participant in a case study is asked to write up a case greater than 10 minutes after the case has happened. For this, some additional information on the scenario is needed from the study participants.

The Institute's theory, says Paul Sherman, who found that 90% of the population of any community is not likely to be involved in theft. "Clearly, the percentage of individuals who are involved in theft is quite small," he says. "The percentage of individuals who are involved in theft is quite small, and the percentage of individuals who are involved in theft is quite small." Sherman says that the Institute's theory is based on the fact that the majority of the population is not involved in theft. "The majority of the population is not involved in theft," he says. "The majority of the population is not involved in theft."

# Program Accomplishments

- Workshops for teachers, emergency managers, and geologists
- Initiated the first ever Southeast Shakeout
- Shakeout Drop, Cover, and Hold video
- EQ Social Media
- Exhibition at SC Museum; now a traveling exhibit
- FEMA 154/ATC 20 training
- Earthquake Plan Update
- Re-evaluation of the intensity data from 1913 Union County EQ

# Significant Program Accomplishments

## SC Earthquake Guide

First Place Winner of the  
2013 [Blue Pencil & Gold  
Screen Award](#)

# Upcoming Plans/Initiatives

- Earthquake Education and Outreach
- Partnerships
- Mitigation Workshop for emergency managers
- Support of CAPSTONE 14
- ROVER based Critical Asset Inventory Project
- ATC 20 & FEMA 154 Training
- HazUS Workshop
- Shake Van \$\$\$\$\$\$??????

# Current Program Challenges
